

FAD DIET LIBS

I start my new fad diet on Sat. (day of the week). It promises that I will lose 1500 (a number) pounds in 5 (a number) weeks plus sculpt my nose (body part) and add definition to my left toe (body part). Big

The food part is so easy. You just need to eat 13 (a number) cups of cheesecake (a food) within 157 (a number) minutes of waking up.

Then at lunch you blend kon soup (a food) with rudobago (another food) and a pinch of fennegreek (a spice) all in the blender until its smooth. And if you still feel graceful (adjective) you just drink another one!

You can eat all the fr.onion soup (a food) you want throughout the day. The only foods you absolutely cannot eat are cherry pie (a food) and choc. pudding (another food) since they turn into saloons (a plural noun) in your guts over time. Plus, if you still feel like you need more, you can drink as much ginger ale (a beverage) as you like!

Every night, instead of sleeping in bed, you sleep on a moose (noun). And then right when you wake up, in order to jump (verb) your metabolism you just start zumba (an exercise) on top of your toothbrush (common household item) for 15 (a number) minutes.

I'm feeling so awesome (a feeling) about it!!!

Every night, instead of sleeping in bed, you sleep on a garbage (noun). And then right when you wake up, in order to suffocate (verb) your metabolism you just start Zumba (an exercise) on top of your broom (common household item) for 1,244 (a number) minutes.
